Experience

KENYA POWER AND LIGHTING COMPANY LIMITED
2024 - (MAY- JULY)
ATTACHEMENT

During my attachment at Kenya Power and Lighting Company (KPLC), I gained invaluable practical experience within the Construction and Design, and Maintenance departments. This experience provided a comprehensive understanding of the electrical power distribution network. In the Construction and Design department, I was involved in assisting with the design of power distribution layouts, observing site surveys, participating in project planning. This allowed me to apply theoretical knowledge of electrical engineering principles to real-world scenarios. In the Maintenance department, I participated in observing and assisting with routine maintenance of transformers and power lines, learning about fault detection and repair procedures, documenting maintenance activities]. This hands-on experience enhanced my understanding of the operational aspects of power distribution and the importance of preventive maintenance.

Education

2021- TO DATE
JKUAT
(MAIN CAMPUS)

I am actively engaged in a Bachelor's degree program in Business Computing, acquiring knowledge in both technical IT skills and essential business management principles.

2017-2020
UPPERHILL HIGH SCHOOL

Completed secondary education and attained a strong academic foundation, evidenced by a B-(plain) and an aggregate score of 70 on the Kenya Certificate of Secondary Education (KCSE)

2008-2016
KWASHEE PRIMARY SCHOOL

Obtained a Kenya Certificate of Primary Education (KCPE) with an average of 374 marks.
